HARSH CHOROTIYA

Madipur, Delhi | 9289056036 | harshchorotiya2501@gmail.com | LinkedIn | GitHub | Portfolio

CAREER OBJECTIVE

Detail-oriented Computer Science & Engineering diploma graduate and BTech student seeking an entry-level Data Analyst internship. Eager to apply SQL, Python, Power BI and Excel skills, along with hands-on project and automation experience, to dashboards, MIS reports and business metrics in fintech and digital lending.

EDUCATION

BTech in Computer Science & Engineering 2026 – 2029
BITS Bhopal (L.E.)

Diploma in Computer Science & Engineering 2023 – 2026
Ambedkar DSEU Campus | Aggregate Score/CGPA: 7.14 CGPA / 71.4%

Higher Secondary Certificate (12th Standard) 2022
CBSE | Percentage: 68.6%

KEY SKILLS

Technical Skills:	SQL (MySQL, SQLite), MS Excel, Power BI (DAX), Python (Pandas, NumPy, Matplotlib, Seaborn), UiPath Studio, Flask, HTML, CSS, JavaScript, Bootstrap, Git basics, Render (deployment)
Core Competencies:	Data Cleaning, Data Aggregation, Data Visualization, Excel Automation, Reporting

ACADEMIC PROJECTS

Zomato Bangalore Restaurants Analysis Code
Python, Pandas, MySQL, SQLAlchemy, Power BI

- Cleaned 51,717 raw records down to 41,190 in Pandas (removed duplicates, nulls and “NEW” ratings, fixed encoding errors), loaded them into MySQL and wrote SQL queries (GROUP BY, HAVING, CASE) on ratings by location, price range, cuisine and online ordering.
- Found that average rating rises with price (3.57 Budget to 4.13 Luxury) and that online-order restaurants are about 24% cheaper with a similar rating (3.72 vs 3.66).
- Built an interactive Power BI dashboard with 4 KPI cards, DAX measures and slicers for location, listing type and online order.

Superstore Sales Analysis — End-to-End Data Analytics Code
Python, Pandas, MySQL, SQLAlchemy, Seaborn

- Cleaned and transformed 9,800 sales records in Pandas, loaded them into MySQL and wrote SQL queries (GROUP BY, aggregation) for category, region and product-wise revenue.
- Built Matplotlib/Seaborn charts showing year-over-year sales growth, December as the peak month, and Technology and the West region as top performers.

LifeDrop — Blood Donor & Emergency Request Platform Live | Code
Flask, SQLAlchemy, SQLite, Bootstrap

- Built and deployed a full-stack, database-driven platform with donor registration, blood-group/city search, emergency requests, and blood-camp listings.
- Developed a secure admin panel (session-based authentication) to manage donors, camps, emergency requests, and contact messages.

Personal Portfolio Website Live
HTML, CSS, JavaScript, GitHub Pages

- Designed and built a responsive single-page portfolio with projects, skills, experience, an interactive terminal-style section, a resume download, and a contact form.

INTERNSHIPS / WORK EXPERIENCE

Software Developer – Trainee (RPA), Centelli India LLP Apr 2026 – May 2026

- Built and tested UiPath workflows to automate Excel- and Outlook-based reporting and business processes.
- Used DataTable and Dictionary-based logic to aggregate, clean, and process data across three workflows: sales reporting, bonus processing, and leave applications, reducing manual reporting effort.

Data Science Intern, YBI Foundation Jun 2025 – Jul 2025

- Cleaned datasets and performed exploratory data analysis and visualization in Python.
- Applied basic machine learning concepts on sample datasets.

CERTIFICATIONS

- Data Analytics Job Simulation – Issued by Deloitte via Forage (2025)
- Data Science and Machine Learning Internship Certificate – Issued by YBI Foundation (2025)
- Internship Certificate (Robotic Process Automation using UiPath) – Issued by Centelli India LLP (2026)
